

POWER STRIM

Universal STRIMMER HEADS

Fit easily to all straight shaft anticlockwise rotation machines

Designed, engineered and rigorously field tested to ensure a balanced and vibration-free performance.

These rugged, hardwearing heads have been specifically developed to provide a simple, economical alternative to the conventional nylon line heads.

- **Hassle-free; less down time**
- **Simple, fast line changing**
- **Lightweight and vibration free**
- **No mechanical parts**
- **Uses any gauge of nylon line**

**AT LAST - AN ULTRA SIMPLE SOLUTION
no more rewinding of line**

Choosing the right **POWERSTRIM** for your machine

If your machine is 0.5kW (approx. 18cc) or above, the **POWERSTRIM 4** is the right unit for your normal strimming needs.

For machines of 1.5kW (approx. 36cc) or above, you may choose to fit the heavy duty **POWERSTRIM 6** to tackle the much tougher jobs

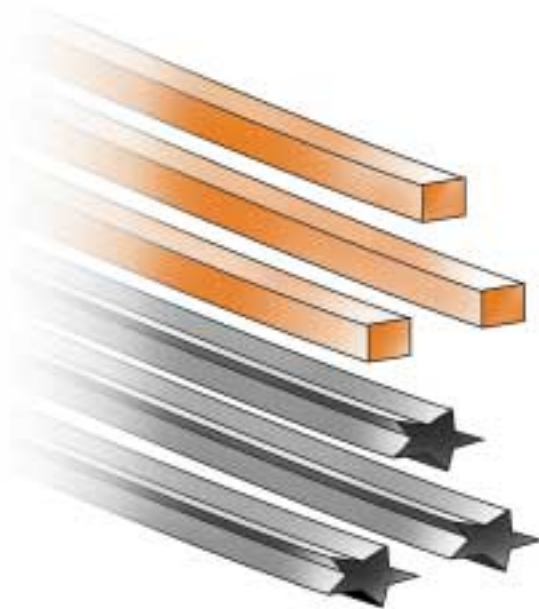

Both heads are supplied with standard 3mm square profile line but can operate with any gauge up to our rugged, heavy duty 4.4mm star profile line.

- Ultra simple, twist and lock line changing
- Hardwearing, long lasting - no mechanical parts
- Multiple lines reduce cable wear rate
- Versatile, uses any gauge of nylon line

- Ultra simple, fast line changing
- Unique multi-line design - mulches and scatters as it cuts
- Tackles the heaviest jobs with ease
- Versatile, uses any gauge of nylon line

POWERSTRIM heads are supplied with a simple conversion kit allowing them to be easily fitted to any straight shaft anti-clockwise rotation machine. Line changing is also remarkably quick and easy.

Each unit comes fitted with standard 3mm square profile line but can operate with any gauge up to our rugged, heavy duty 4.4mm star profile line.

Both sizes are available in pre-cut 30cm lengths:
The 3mm standard square profile in packs of 24
The 4.4mm star profile in packs of 12
